New Aurora Colours
From the Marmo Collection

Solid Surface Material

Aurora Colours

Inspired by the breathtaking natural beauty of the Aurora Borealis or Northern Lights, the Aurora colour palette from the HIMACS Marmo Collection evokes marble-like aesthetics with subtle and strong shades alongside delicate and detailed veining. The tones echo the fluidity of the sky and its natural wonders with semi-translucent effects that allow designers to experiment with a play on light, bringing natural beauty into their interior projects and clients' homes. Now HIMACS has introduced 12 new Aurora Colours to the Marmo series, expanding the versatility of this collection even further.

Combining practicality and aesthetics with the beauty of nature and the benefits of the latest generation solid surface HIMACS, this non-porous material can be thermoformed to create curvaceous designs and seamless surfaces that are simple to repair and keep clean. The collection is suitable for both residential and commercial projects, including hotels, office spaces, retail environments and more. Highlights of the new Aurora Colours include Calacatta Luna with its distinct veining and Aurora Frost with ethereal semi-translucent properties, resulting in an updated collection with something for every scheme and every design aesthetic.

Clean, crisp and seamless,
this unique finish is perfect
for contemporary spaces. Its
delicate veining and luxurious
style resembles the rare and
exotic look and feel of Italian
calacatta marble.

Aurora Calacatta Luna

≈

A lightly veined creamy finish gives this colour a natural look perfect for classic and contemporary interiors.

Aurora Cocoa

M624

12 mm

Darker in tone, this richly detailed design features swirling clouds of white on a dark brown backdrop.

Deeply dramatic, this finish is reminiscent of a starless night sky. An expanse of black with hints of veining, it makes an instant impact.

Aurora Terra

The HIMACS Marmo colours are available from stock in the standard format 3680 x 760 mm.

≈ Marmo is a randomly veined product, specific fabrication guidelines need to be followed. Ask your sales partner for more information, and see more details at himacs.eu.

👁️ Colours with this mark have a semi-translucent effect, evident when combined with light sources.

*The basic HIMACS material is identical for every colour but it is important to note that darker and more heavily pigmented colours will show dust, scratches, haziness, marks left by hard water and other ordinary wear and tear more noticeably than lighter textured colours. Therefore colours marked with a * are less suitable for applications that are exposed to extensive surface contact such as worktops located in heavy traffic area.
